

SPORTING EVENTS CALENDAR 2017/18

We see this as an important part of our programme, in terms of increasing the range of activities and competitive sport opportunities available to our students. We also believe that having a broad range of experiences will promote aspects of the student's spiritual, moral, social and cultural development.

Surrey Special Schools Sports Association is an organisation consisting of around 40 special needs schools. Each school has a representative on the organising committee. The committee organise an extensive timetable of events throughout the academic year across the ability and age range. Young Epilepsy both organises, hosts, and attends events.

We also attend several Surrey school games inclusive events organised by Active Surrey. We won the Surrey school games for 2015-16 and have received the school games mark at silver level. This highlights our commitment to increasing opportunities for participation in competitive sport.
